Section 1. Data Sources (Forms)

Data Sources (Forms) Reference List

Form Type	Form Description
Birth Forms	
Birth Certificate	An official document issued to record a child/person's birth and identify them by name, place, date of birth and parentage.
Birth Notification	An official document issued by the hospital where birth took place within 6 months. Contains name of the child, parents' names, the hospital in which the child was delivered, the date, stamp and an authorized signature from the hospital. Used to apply for the Birth Certificate.
Inpatient Forms	
Inpatient Diagnostic Index Card	A card for coding and indexing of the patients' conditions involved.
Mother and Child Booklet	A booklet containing information on safe pregnancy, delivery and child health. This booklet is kept by the mother/caregiver and used every time the mother/caregiver visits clinic from the first antenatal care visit until the child completes all required visits. It ensures continuity of care and provides health education to parents.
Inpatient/Clinical Medical Notes	Medical notes documented by clinical staff in the medical file during an inpatient stay. The notes include details of every procedure or intervention that was given to the patient to monitor patient progress, for reference and continuity of care. Notes are usually updated after every ward review.
Nursing Notes (Cardex)	These notes are a quick summary of individual patient needs that are used by nursing staff to communicate important information about their patients and updated at every shift change.
Inpatient Unit Perinatal Chart	A structured and standardized form for assessment and documentation of information about a pregnant woman's health and care. This form is usually started immediately after confirmation of pregnancy.
Drug Treatment Chart	A record of all drug treatments administered to a patient while in the ward. This record contains details such as date drugs prescribed, started, stopped, dose, route, frequency, and names of prescribing clinical staff.
Labour, Delivery, Postnatal Case Notes	Medical/clinical notes documented in patient file during labour, delivery, and post-natal care.
Reporting Form for Adverse Events	A tool used to collect initial and follow-up information for all adverse events in patients.
Admission Form	A form for recording patient information at the time of admission in the ward.
Prescription Form (CC pathway)	A document used by clinical staff to prescribe and/or document the drugs required by a patient.

Facility Name:

Facility Code:

Form Type	Form Description
KMC Chart	A tool for monitoring the progress of each individual baby enrolled in a Kangaroo Mother Care (KMC) Programme. This usually contains details including the baby's name, age, weight, hourly monitoring and total KMC time.
Vaccination Record (BCG, Polio 0)	A card used for documenting immunization progress of each individual baby.
Facility/Ward Transfer Form (Referral)	A tool for documenting patient information and/or medical notes while being transferred from one ward to another ward or from a hospital to another hospital. This usually contains details such as patient biodata (e.g., name, DOB, etc.), admission diagnosis, treatment given, and the reason for referral.
Daily Bed Return Form (Occupancy)	Daily summary statistics of ward data usually compiled by a nurse on duty. This usually contains details including the names and number of patients admitted and discharged, number of beds and cots, admission and discharge summary statistics, etc.
Death and Discharge Forms	
Discharge Form	A record for documenting patient information at the time of discharge from the ward.
Neonatal Death Audit Form	A structured form for reviewing and/or documenting cause of death for babies <28 days. This usually contains details about the mother and infant, including intrapartum care, neonatal causes of death, place of death and resuscitation.
Perinatal Death Audit Form	A structured form for reviewing and/or documenting cause of death for stillbirths or babies in the first 7 days of life. This usually contains details about the mother and infant, including intrapartum care, causes of death, place of death, and resuscitation.
Death Certification Form	An official document used by clinical staff to record the cause of death for each patient.
Neonatal Death Notification	An official document issued by the hospital where death took place for babies <28 days. This usually contains details about the mother and infant, including causes of death, place of death, the date, stamp and an authorized signature from the hospital. Used to apply for the Death Certificate.
Perinatal Death Notification	An official document issued by the hospital where death took place for stillbirths or babies in the first 7 days of life. This usually contains details about the mother and infant, including causes of death, place of death, the date, stamp and an authorized signature from the hospital. Used to apply for the Death Certificate.
Other Forms	

Facility Name:

Facility Code:

Form Type	Form Description
Paediatric Admission and Discharge Form	A paediatric admission form is a structured record for documenting information at time of admission and during inpatient stay. This usually contains details like patient biodata (e.g., name, DOB, etc.), history, examination, investigations, admission diagnosis and name of admitting clinical staff member. A paediatric discharge form is a structured record for documenting information at discharge from the paediatric ward. This usually contains details like patient biodata (e.g., name, DOB, etc.), discharge diagnosis, management while in the paediatric ward, discharge outcome, follow-up care and name of discharging clinical staff member.
Burial Permits	An official statement authorizing the removal of the dead body from mortuary to the cemetery.
Follow-Up Card	A card providing details of any follow-up outpatient appointment, including date, time, and location.

Section 1. Data Sources (Forms)

Instructions: Please direct these questions towards the data clerk and/or the Health Records and Information Officer (HRIO). Select "Yes" if the document is used at the facility and "No" if it is not used at the facility. The document can be part of a larger document or booklet. If it is used at the facility, indicate the source (who created the form) and if it is paper-based or electronic. Examples of who created the document include "government" if it is an official ministry of health document, "facility" if the facility developed the document itself, "NGO" or "Project" if it is part of a special study or NGO-led program (e.g., WHO KMC study). If the form was created by the facility and is only used by the facility, the source would be the facility.

Please circle the following letter corresponding to the form source:

Gov/MOH = Government/Ministry of Health

Facility

NGO = NGO/Special Project

Other (specify):

If the facility has an informal method of documenting this information, please specify in the description box. It is likely that you will have to walk around to different parts of the hospital to view all the documents. If some of these documents are combined at a facility, please indicate that each one is available in the separate lines.

Please do not leave any variable blank.

Section 2. Data Sources (Registers and Tally Sheets)

Data Sources (Registers and Tally Sheets) Reference List

Form Type	Form Description
Labour and Delivery	
Labour and Delivery Ward Register	This register contains individual patient information for all mothers that are patients on the labour and delivery ward.
Prevention of Mother To Child Transmission (PMTCT) Labour and Delivery Register	This is specifically for mothers whose HIV status was tested during labour and delivery. This register contains individual patient information for all HIV positive mothers that are patients on the labour and delivery ward.
Helping Babies Breathe (HBB) Register	This register contains individual patient information for asphyxiated neonates.
Newborn and Paediatric	
Neonatal Admissions Register	This register contains individual patient information for all neonates admitted to the neonatal unit.
Neonatal Discharge Register	This register contains individual patient information for all neonates discharged from the neonatal unit.
Postnatal Register	This register contains individual patient information for all neonates cared for on the postnatal ward or at the postnatal clinic.
Outpatient Register Under 5 years	This register contains individual patient information for all patients under 5 years old who are cared for at outpatient departments.
Inpatient Register Under 5 years	This register contains individual patient information for all patients under 5 years old who are cared for at inpatient departments.
Death and Referral	
Death/Mortuary Register	This register contains individual patient information for all cases in the facility mortuary. This also includes deaths that have not been certified by clinical staff.
Referral/Counter Referral Register	This register contains individual patient information for all referral cases in a facility.
Mortality and Cause of Death Book	A register for recording all deaths that occur in the facility and have been certified by a clinical staff member.
Other Registers	
Kangaroo Mother Care (KMC) Register	This register contains individual patient information for all babies admitted for Kangaroo Mother Care.
Immunization Permanent Register (EPI)	This register contains individual patient information for all patients who visit for immunizations/vaccinations.
Child Welfare Clinic Register	This register contains individual patient information for all children under 5 years old who visit the child welfare clinic for growth monitoring.
HIV Care and Treatment Register	This register contains individual patient information for all patients who visit the HIV Care and Treatment clinic.

Facility Name:

Facility Code:

Form Type	Form Description
Tally Sheets	
Under 5 years Daily Outpatient Morbidity Tally Sheet	This tally sheet includes summary statistics of all children under 5 years old who are cared for at outpatient departments.
Immunization Tally Sheet	This tally sheet includes documentation of every time a dose of vaccine is administered. They are used as the basis for monitoring and making regular summary reports of vaccine use.
Child Health and Nutrition Information System (CHANIS) Tally Sheet for Child Health Welfare Clinics	This tally sheet includes documentation of every time a child visits the Child Welfare Clinic for growth monitoring. These are used as the basis for monitoring and making regular CHANIS summary reports.
Report Sheets	
Integrated Disease Surveillance and Response (IDSR) Monthly Report	Summary statistics for reporting case-based surveillance of non-communicable diseases. This report is compiled monthly.
Integrated Disease Surveillance and Response (IDSR) Weekly Report	Summary statistics for reporting case-based surveillance of non-communicable diseases. This report is compiled weekly.
Immunization Services Uptake Summary Report	Summary statistics for reporting vaccinations given to children and any vaccine logistics. This report is usually compiled monthly and includes data from the Immunization Tally sheets and Permanent Register for Immunization (EPI).
Integrated Reproductive and Child Health Summary Report	Summary form for reporting reproductive and maternal child health statistics. This report is usually compiled monthly.

2B. Supply of Forms and Registers

No.	Item	Response
	Supply of Forms and Registers	
2.08	Does the neonatal unit have sufficient supply of paper registers in stock right now? (Sufficient is defined as allowing for the documentation of all neonates in the register with extra space to enter additional patients or a new register to use if the current one is filled.)	☐ Yes ☐ No
2.09	Did the neonatal unit have a stockout of paper registers in the last 4 weeks?	☐ Yes ☐ No
2.10	Does the neonatal unit have sufficient supply of paper inpatient neonatal forms in stock right now? (Sufficient is defined as having enough empty forms for the documentation of all neonates in the unit with extra space to accommodate additional patients who might be admitted today.)	☐ Yes ☐ No
2.11	Did the neonatal unit have a stockout of paper inpatient neonatal forms in the last 4 weeks?	☐ Yes ☐ No

Facility Name:

Facility Code:

2C. Register Completion on Weekends and After Hours

No.	Item	Response
2.12	Is the neonatal unit register routinely filled on the weekends ? (Routinely is defined as having a system in place to ensure it is always done, except in the case of an occasional extenuating circumstance.)	☐ Yes ☐ No
2.13	Is the neonatal unit register routinely filled after working hours ? (Routinely is defined as having a system in place to ensure it is always done, except in the case of an occasional extenuating circumstance.)	☐ Yes ☐ No
2.14	Which cadre of staff is primarily responsible for filling out the neonatal unit register? (Select one)	☐ Nurse ☐ Nurse in charge ☐ Data Clerk ☐ Other (specify below)

2D. Register Completeness

Instructions: Responses in the table below are for observation only.

No.	Item	Are all data entry fields complete for the last 4 weeks?	Is the register filled up to last night?
2.15	Neonatal unit register	☐ Yes ☐ No	☐ Yes ☐ No
2.16	Neonatal discharge register	☐ Yes ☐ No	☐ Yes ☐ No
2.17	Kangaroo Mother Care (KMC) register	☐ Yes ☐ No	☐ Yes ☐ No

Section 6. Maternal Perinatal Death Surveillance and Response (MPDSR)

Instructions: Direct these questions towards the data clerk and/or the Health Records and Information Officer (HRIO). Please do not leave any variable blank. If a guideline is available, continue to ask if it is easily accessible. All guidelines must be seen in order to select "Yes" to being available and to being easily accessible. In order to select "Yes" to easily accessible the nurse must know where the guideline is stored and be able to retrieve it quickly. Note that some of these guidelines might be found on the labour and delivery ward. If any guideline is part of a larger protocol, that counts as being available. For some questions, you will need to observe specific items/spaces at the facility.

No.	Item	Response	Skip to
6.01	Do you have the WHO MPDSR or relevant national guidelines?	☐ Available and easily accessible ☐ Available, but not easily accessible ☐ Not available	If "Not available", skip to 6.04
6.02	Select all national tools or WHO "tools for implementation" that the facility is using. (Documents must be observed to select "Yes")		
6.02a	Terms of reference for review committee for MPDSR (e.g., SOP or protocol for MPDSR. This can include relevant national guidelines or WHO MPDSR tools for implementation – Annex 2)	☐ Yes ☐ No	—
6.02b	Sample meeting code of practice (e.g., relevant national guidelines or WHO MPDSR tools for implementation – Annex 3)	☐ Yes ☐ No	—
6.02c	Individual death care review/clinical summary forms (e.g., relevant national guidelines or WHO MPDSR tools for implementation – Annex 12 or 13)	☐ Yes ☐ No	—
6.03	Which, if any, of the following items from the minimal perinatal dataset are reported to the national level? (WHO MPDSR tools for implementation – Annex 14)		
6.03	Cause of death using ICD-10/11 or ICD-PM	☐ Yes ☐ No ☐ Unknown	—
	Other		
6.04	Which, if any, standardised cause of death classification does the facility use for neonatal deaths? For example, ICD-PM or another. (Select all that apply)	☐ None ☐ ICD-PM ☐ ICD-10 ☐ ICD-11 ☐ Other (specify below)	—
6.05	Are neonatal deaths/stillbirths that occur outside the hospital (e.g., brought dead) or in the community included in the MPDSR process?	☐ Yes ☐ No	—
6.06	Does the facility have an MPDSR "champion" or lead?	☐ Yes ☐ No	—
6.07	How is MPDSR information communicated to the sub-national level (e.g., district, county)? (Select all that apply)	☐ None ☐ Regular reports ☐ Regular meetings ☐ Other (specify below)	—

Facility Name:

Facility Code:

No.	Item	Response	Skip to
6.08	Does the facility receive feedback from the sub-national level (e.g., district, county) on MPDSR information?	☐ Yes ☐ No	—

Section 8. Electronic Information Systems and Infrastructure

Instructions: Direct these questions towards the IT Officer. Please do not leave any variable blank

Onsite Backup is a manual backup to a local storage device, such as a USB, CD, external hard drive, or other physical drive. Offsite Backup (cloud based) is a remote backup to an internet-based server. Offsite backup (other) can include a physical backup to a local storage device that is stored offsite or a not cloud-based remote backup to another secure server.

Appendix A. Patient-Level Data

Instructions: Direct these questions towards the data clerk and/or the Health Records and Information Officer (HRIO) and the nurse in charge. You might need to follow-up with the nurse to answer some of the questions. Please indicate if this variable is recorded for each newborn on the neonatal unit by circling yes or no. If yes, then write the name of the document where it is recorded (e.g., discharge register, inpatient notes). If the variable is collected at the facility but the document name is unknown, write “unknown”.

Note: In countries with standard forms across all facilities, this section does not need to be done at every facility.

No.	Variable	Are the following collected at this facility?		Document name where variable is recorded
		Yes	No	
0.01	Baby Hospital ID / Registration Number	☐	☐	
0.02	Readmission	☐	☐	
0.03	Geographical information on the patient's residence	☐	☐	
0.04	Date of birth	☐	☐	
0.05	Time of birth	☐	☐	
0.06	Date of admission	☐	☐	
0.07	Time of admission	☐	☐	
0.08	Birth location	☐	☐	
0.09	Weight on admission	☐	☐
